

“No aborted jobs due to lack of outreach.”

## YOUR BENEFITS

- **Excellent working envelope**  
Reach as far as is safely possible at any basket load due to our moment sensitive outreach – comes as standard.
- **Smoother, faster, more accurate operation**  
Enjoy a smoother experience with millimetre accuracy due to our battery-powered *E-Drive* platform, that is 25% faster than comparable platforms.
- **Fuel and CO2 saving**  
*E-Drive* – our unique, self-charging hybrid system, allows the engine to be off whilst operating your platform; you save on fuel and engine service costs.
- **Greater payload in the vehicle**  
Our optimised structural designs use high quality materials so our platforms are lighter than other brands, without compromising safety; giving you more payload to carry tools and equipment.
- **Extra safety feature for your operator**  
Insulating harness anchors in the 2-man GRP composite basket
- **Minimal maintenance**  
We use stainless pins and maintenance-free bushes.

## WHY ALDERCOTE?

Designed for easy operation and low maintenance, our optimised platform designs use high quality materials so are lighter than other brands, without compromising on strength or safety. This makes our access platforms an ideal choice for installations and maintenance of telecommunications and fibre optic cables as customers can enjoy more payload than other options available for their tools and equipment.

## ALMOST SOUNDLESS

Because our platforms are battery-operated, there is no noise from an idling engine. It also means our platforms can operate in in Clean Air Zones without difficulty.

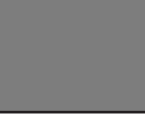

## ENTERPRISING SOLUTIONS

We design and manufacture everything inhouse, so our experienced team has an in-depth knowledge of our platforms and their capabilities. We can therefore advise on many options to improve safety and productivity to suit your specific requirements.

“A great product, with great quality, that’s packed with innovation.”

Gary Harrison IMIM  
Head of Engineering,  
Rivus (Openreach)

NB: This table is not a comprehensive list but reflects examples of common models chosen by our telecoms' customers.

|  |  |  |  |  |  |  |          |
|--|---|---|---|---|--|---|---|
| V125   |  | 12.5m   | 7.2m–7.6m   | 200kg   | No   | 3.5t–7.2t   | Ford Transit<br>Iveco Daily<br>MAN TGE<br>Mercedes Sprinter<br>Renault Master<br>VW Crafter |
| VZ135  |  | 13.7m   | 6.7m–8.9m   | 220kg–250kg   | Yes  |   |   |
| VZ140  |  | 14.3m   | 6.7m–9.1m   |   |  |   |   |
| CZ140  |  | 14.1m   | 6.8m  | 250kg   | Yes  | From 3.08t  | Ford Ranger<br>Isuzu D-Max<br>Toyota Hilux  |
| CUSTOM CT120   |  | 12.9m   | 7.2m  | 150kg   | Yes  | 7.2t  | Iveco Eurocargo   |

NOTE: Working height may vary by up to 0.3m depending on vehicle floor

## OUR CUSTOMERS CHOICE

### Robustness and simplicity – V125

This simple articulating design, with electro-hydraulic controls, and our proven electric safety interlock system, ensures downtime will be rare.

### The popular choices – VZ135 & VZ140

Mounted onto 3.5t vans for standard licence holders, or 5t for serious load carrying, these platforms comfortably meet most working at height requirements.

### For extreme locations – CZ140

Mounted to pickups for working off road, the CZ140 offers stability and class-leading reach in the most challenging locations.

### For overhead cabling – CT120

Gives onboard power and cable tensioning winch. Also provides towing facility for cable and drum trailers.
